DESCRIPTION

The ARTEC-308 2-way passive full range loudspeaker utilizes a 8" low frequency transducer and the M-26 compression driver. The cabinet manufactured using top quality of Birch plywood and finished with a durable black paint finish. The 8" woofer provides an exceptional bass response considering the cabinets reduced size.

The Artec-300 cabinets are constructed from Baltic Birch plywood and finished with a durable ISO-flex paint. The trapezoidal enclosure design helps eliminate standing wave coloration and at the same time, permits close-packed horizontal or vertical arrays.

A rotatable horn allows the systems to be installed in either the vertical or horizontal position maintaining the needed dispersion characteristics. The cabinet is delivered with a U-bracket mount.
